

## **Tim McWilliams M-W September Class Job Opportunity Profiles** October 7, 2017

The below companies I would be Interested in working with. Even though some are looking for intermediate level would hope that with past experience in the business work-place, I could be considered and then on the the interview where I would sell my skills. (from Glassdoor)

### **First Opportunity to Target:**

**LyntonWeb** is looking for a contractor who has immediate bandwidth to take on overflow development work. Please respond with your HubSpot experience and your hourly rate.

LyntonWeb is a HubSpot agency serving small and midsize businesses with inbound marketing, web development, and marketing integration services. We are looking for a talented HubSpot web developer to join our team. LyntonWeb has employees and offices in Houston, Cleveland, Pittsburgh, and Denver, but we are looking for candidates anywhere in the US with experience working remotely.

Requirements for a good fit:

- HubSpot COS development experience
- Intermediate / Advanced knowledge of Javascript, JQuery, PHP, HTML, CSS -- if you are lacking in any of these areas you must be eager and willing to learn fast!
- Experience with WordPress and CMS development best practices
- Ability to work on multiple projects
- Comfortable in a fast-paced environment
- Strong desire to learn and be challenged
- Problem solver
- Detail oriented
- High Standard of Excellence
- 1-3 years experience

Additional experience considered a plus but not required:

- Understanding of Inbound Marketing methodologies
- Any other programming knowledge (Python, C#, ASP.NET, XML, and Mobile Apps)

Other important items:

- Comfortable working in a team or independently
- Good verbal and written communication skills
- Ability to work remotely
- Strong desire to learn and stay at the forefront of web technology
- Not afraid to ask for help when you get stuck
- Agency experience is a plus
- Be utterly passionate about the web!

**Next Position Interested in:**

May be a good fit for this since looks like they are reasonably flexible and would be a good company to start with: - Also from GlassDoor

- Software Developer

**Smith & Associates**

Software Engineer

Smith & Associates knows electronic components inside and out. As the industry leader in electronic components and supply chain management, we are looking for bright, energetic, and talented people to join our expert international team. We have a dynamic, entrepreneurial culture where individual contributions are expected and valued.

As a Software Developer, you will be building applications and deliver innovative solution using modern technologies. The Application Development team develops and maintains a wide spectrum of applications to support company's day-to-day business.

**Required Skills****Day-to-day Responsibilities:**

- Develop web applications (front-end and back-end) with focus on usability and scalability based on business requirements
- Production support and trouble-shooting for existing applications
- Work with senior developers in solving new and existing technical issues
- Perform maintenance and development of existing web applications in a multi-tier architecture.
- Build robust, reusable and highly maintainable web services.
- Working with business analysts, functional users and interacting with other developers to translate business requirements into technical ideas and ensure that code functionality meets requirements

**Required Experience****Requirements**

- Bachelor or Master degree in Computer Science or similar engineering field
- 0-3 years of development experience with strong recent experience in web applications
- Need to know Java well and solid understanding in Object-Oriented design principles
- Solid experience with OO driven development and frameworks, JavaScript frameworks such as AngularJS(1 or 2) are highly desired

- Solid experience in HTML, Javascript, CSS and front-end technologies
- Relational Database knowledge and experience
- RESTful API design and implementation experience
- Excellent debugging and problem-solving skills.
- Experience as a SQL developer on relational database, such as Oracle or SQL
- Be willing to help your teammates, share your knowledge, and learn from them. Be open to receiving feedback.

#### Pluses

- Responsive UI/UX design, web design or Mobile App development experience
- Hands-on experience with Node.js, MongoDB, Grunt
- Linux scripting skills
- Job Location

Houston, TX

#### **Next Job:**

Even though they get a low rating from GlassDoor (2.2) could be a good stepping stone to next level. Remember - It's not the job you start with but the one you end with.
